

List of Unused ROM Space

This is a list of free ROM space for FF3us 1.0. Note that if you plan on expanding some data you might need specific free space after the data you want to expand, and some editors like FF6LE do this for certain data, this is why we included what is before the free space. All offsets are for unheadered ROM. Note that we did not include free space lower than 6 bytes, because you cannot do anything with that size of free space.

Start	End	Before	Size Hex	Size Decimal
\$C0D613	\$C0DF9F	Bank \$C0 Code	\$098D	2445
