

madsieur's Patches

Copies of the patches will soon be hosted on madsieur.net and are for the most on [RHDN](#). For my patches that have a GBA version, the GBA version is included in the SNES archive but will also be soon listed on the wiki [GBA patches page](#).

All patches are for headerless ROMs. Some patches have ASM file to make possible a custom implementation. All ASM hacks were assembled with [xkas 0.06](#). The readme.txt file with each archive often contain more info than the patch wiki page so have a look at it. If you have any question or comment you can post in the patch thread linked on the patch wiki page.
