Header	No

Files

```
antifreeze_C2_nh.ips: Patch that use free space in bank $C2
antifreeze_C2.asm: bass assembly file of the above patch
antifreeze_EX_nh.ips: Patch that use free space in bank $EE
antifreeze_EX.asm: bass assembly file of the above patch
```

Description

This hack repurpose the unused “repel Magitek” item flag in FF3usME to make it repel Freeze status instead (\$D85006 bit 3 in the monster data). This hack does not alter any equipment data to make use of the new flag.

The bank \$C2 hack use 19 bytes of free space at \$C26480 and the EX hack use the same amount at \$EEAF1A. Those free space offsets can be changed in a ASM file by changing the offset of the “seek” macro call. Both hacks insert a JSL or JSR in the code the set equipment properties at \$C2291A.

To assemble the hack use bass v14 by typing a command such as “bass -o rom.smc antifreeze_C2.asm”.
