

Thank you!

FF3us / FF6 documentation and hacking has been going on for more than 15 years. The state of the game today being the most documented on SNES and having the most editors to make mods is due to the work of dozens of people since the early 2000's. This is a list of significant people that have passed in the scene or are still part of it and some people that helped greatly on the wiki or ff6hacking.com in general. For those that are making mods and are not included here, your presence and work is also a part of what keep the FF6 communities going on.

For specific credits on FF3us ROM map, data, data formats, scripts, algorithms and disassembly info please refer to [this page](#). Thanks to everyone who contributed to editors, bugfixes, patches, assembly documentation, game documentation, specialized FAQs, debuggers, SNES documentation, hacks, help on different forums and wiki building.
