

Spell & Item Special Effects Pointers

The same value (\$27, \$38 or \$4B) in spell data is used to check both tables. A spell that only has a once-per-target effect only has an entry in the first table, with RTS in the second while a spell that only has a once-per-strike effect and a RTS in the once-per-target table. An attack that has both will have entries in both tables.

Unused Entries

Special Effects Code Pointers 1 (once-per-target)					Special Effects Code Pointers 2 (once-per-strike)				
Ptr Offset	Ptr Value	Function	ID	Effect Name*	Ptr Offset	Ptr Value	Function	ID	Effect Name*
