

Song Header

Byte	Description
	2 bytes preceding data in the ROM are the length of the song
\$00-\$01	Song Start Address
\$02-\$03	Song End Address
\$04-\$13	Voice Start Addresses (8 tracks, 2 bytes each)
\$14-\$23	Voice Start Addresses (alternate start position, 8 tracks, 2 bytes each)
\$24-EOF	Song Data (Music Commands)

The addresses will point relative to the start of the song header (byte \$00 in the table).

List of Music Tracks

The song names with '()' brackets are ambient sounds not present in the official soundtrack cd.

\$53	\$C9BAF9	Ending Theme #1
\$54	\$C9DF3F	Ending Theme #2

Indexes \$51, \$55-\$FF are empty.

RAM addresses

Currently loaded song index is (in most cases) stored to [Save RAM](#) address \$1F80. The game loads a new song index from [Field RAM](#) address \$053C. This can be utilized by finding an exit where a song changes (eg. Classroom entrance) and poking the memory address \$053C; this causes the game to load the poked song index when the exit is used.
