

Location Tile Sets

Overview

Location Tile Sets have indexes for Layer 1 and Layer 2 tile sets and will be loaded in pairs, one for each layer 1 and 2.

Location Tile Sets are associated with (they use) 4 GFX sets, a Solidity set and a Palette set,

Some Location Tile Sets will optionally use Animation for Layer 2 and Layer 3 GFX (with animation).

Description	Value
SNES offset	\$DE0000
Chunk size	compressed
Size (decompressed)	\$800
Number of chunks	\$4B
Total size	\$1B400

Tile Sets Data

Each tile set is \$800 and has a maximum of \$100 tile (16×16). Each tile is composed of 4 8×8 subtiles, top-left (1), top-right (2), bottom-left (3) and bottom-right (4). Bytes \$400 to \$7FF are one byte of data per subtile, starting from all top-left subtiles (\$400-\$4FF) and following same order as described above. As an example consider tile \$F3 of the tile set:

subtile	tile set offset
top-left	\$4F3
top-right	\$5F3
bottom-left	\$6F3
bottom-right	\$7F3

This data byte has the following format:

bit 0	?
bit 1	?
bits 2-4	Palette ID (0 to 7)
bit 5	Priority one
bit 6	Mirrored
bit 7	Inverted
